PILOT

BUILT FOR THE DREAMDEX PERPS BOUNTY · MVP

YOUR AGENT WRITES THE ORDER. PILOT HOLDS IT SHORT.

An MCP server between any agent and dreamDEX perps on the Somnia testnet.

THE HOOK

HANDING AN AGENT A TRADING KEY IS ALL OR NOTHING.

CALLSIGN	MARKET	SIZE	SENT
AGENT	any	any	immediately

The SDK + a key: any order the exchange accepts.

THE PROBLEM, FROM A REAL RUN

CODEX PROPOSED A $HORT WORTH $40.11. YOU ALLOW $25.

Codex CLI, 2026-10-24 02:41:11 UTC · evidence/p3-mcp-run-codex-journal.jsonl row 4

HELD SHORT, THEN CLEARED.

BAY 1 · CODEX CLI · 2026-10-24

held short · 02:41:11 — REFUSED · NOTHING SENT

CALLSIGN	MARKET	SIZE	NOTIONAL
CODEX	BTC short · IOC	~~0.0005~~ 0.00031	$40.11 cap $25

maxNotionalUsd · next safe action: reduce size to at most 0.00031 BTC

STOP BAR · YOUR LIMITS — CHECKED BEFORE BROADCAST

cleared · 02:41:21 — CLEARED · FILLED

CALLSIGN	MARKET	SIZE	NOTIONAL
CODEX	BTC short · IOC	0.00031	$24.86 cap $25

0x385c1486…8080 · success @ block 31576050

HOW IT HOLDS

CHECKED WHEN PLANNED. CHECKED AGAIN WHEN SENT.

01
agent
Claude Code, Codex CLI, any MCP client

02
plan_order
SDK previews + your policy

03
plan_id
one-shot, expires in 60 s

04
place_order
re-checked on live state

05
dreamDEX
tx, then the journal

markets-sdk 0.32.1: `getMaxPerpOrderSize` `previewPerpOrderMargin` `previewPerpLiquidationPrice` `placePerpOrder`

THE RUN, TWICE

THE JOURNAL AND THE EXPLORER AGREE.

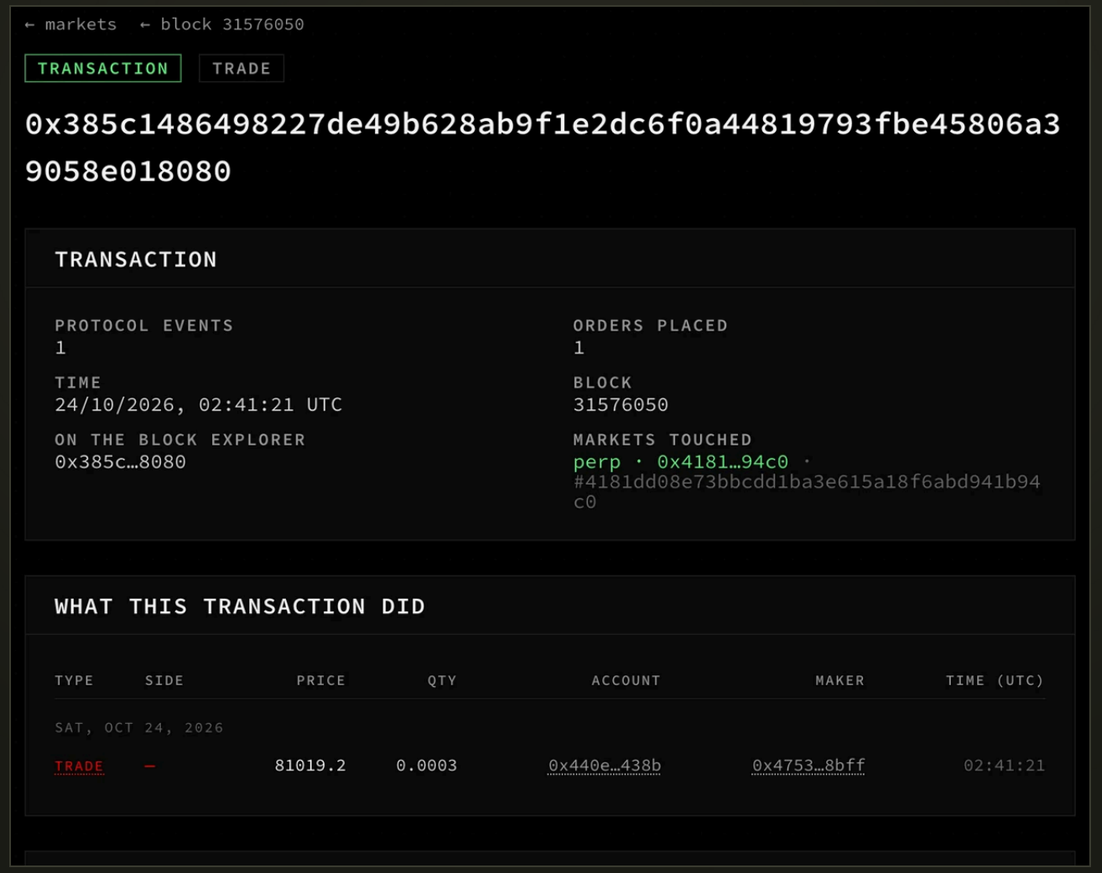

PILOT JOURNAL · CODEX CLI — ROWS 4–7

```
02:41:11   plan_order BTC short 0.0005
           refusal · maxNotionalUsd

02:41:18   plan_order BTC short 0.00031

02:41:21   place_order
           filled 0.00031 · block 31576050

02:41:24   close_position BTC
           position after 0 · block 31576075
```

dreamDEX Hideki markets explorer, captured 2026-10-27; it rounds the size to 0.0003.

SEVEN WAYS IT SAID NO.

YOUR LIMITS

11 rows

maxNotionalUsd ~~0.57 SOL~~	6
allowedMarkets ~~200 DOGE~~	4
minLiquidationDistancePct ~~3 SOL~~	1

PILOT'S OWN CHECKS

4 rows

minQuantity ~~0.04 SOL~~	1
unknownPlan	1
planExpired	1
planAlreadyUsed	1

Each names a next safe action: pick one of BTC, ETH, SOL

WHY NOT JUST THE SDK

THE CAP IS ON THE POSITION, NOT THE ORDER.

SMALL ORDERS CANNOT STACK

open 0.2 SOL planned at $20.54

add ~~0.1 SOL~~ leaves $30.80 > $25

LIMITS NO TOOL CAN EDIT

Read-only to pilot.

CLOSING IS NEVER BLOCKED

Not even by an invalid policy file.

RECEIPTS · DEMO.MD

EVERY NUMBER IS A JOURNAL ROW.

15
refused, nothing sent

9/9
opened, closed flat

7
distinct rules

2
agents: Claude Code, Codex CLI

“TESTNET ONLY. NOTHING HERE HAS RUN ON MAINNET.”

README · HONEST LIMITS

THE ASK

SET YOUR LIMITS ONCE. LET THE AGENT TRADE INSIDE THEM.

```
$ npm ci && npm test
```

github.com/edycutjong/dreamdex-pilot

Read DEMO.md: every tx linked to its fill.
